Haleyangadi, Mangaluru

OBJECTIVE

MCA final-year student skilled in Python, Java, SQL, and Full-Stack Development. Experienced in building AI-powered applications, web solutions, and computer vision projects. Seeking a Software Developer role to contribute to innovative and scalable solutions.

EDUCATION

NMAM Institute of Technology, Nitte — MCA CGPA: 6.65	2024–2026
Vijaya College, Mulki — BCA CGPA: 6.62	2021–2024

TECHNICAL SKILLS

- Languages: Python, Java, C, JavaScript, PHP
- Frontend: HTML, CSS, React.js
- Backend: Node.js
- Databases: MySQL, MongoDB
- Tools: TensorFlow, OpenCV, Git, VS Code, Excel

PROJECTS

AI-Driven Sign Language Translation:	GitHub
• Developed a real-time sign language translation system using Python, TensorFlow, and OpenCV. • Implemented a dual-model approach using ResNet-18 for word-level recognition and a custom CNN for alphabet detection. • Achieved accurate gesture recognition, enabling effective communication for hearing-impaired users.	
AI-Based Beach Waste Detection and Cleanliness Monitoring:	GitHub
• Developed an AI-powered system to detect and classify beach waste in real time using computer vision and deep learning techniques. • Implemented YOLOv8-based object detection models for identifying plastic bottles, cans, bags, and other litter. • Integrated data visualization and reporting features for beach conservation and waste management.	
QR Code Fraud Detection System:	GitHub
• Developed a system to detect fake or malicious UPI QR codes using Python and OpenCV. • Implemented QR code scanning, upload, and validation features for real-time verification. • Improved digital payment security by identifying suspicious QR patterns and preventing fraud.	

INTERNSHIP

Frontend Developer Intern (React.js) — CodeLab Systems	Jan 2026 – Feb 2026
• Developed responsive React.js user interfaces and integrated REST APIs for dynamic data handling. • Improved application usability and frontend performance through component optimization. • Collaborated with development teams using Git version control and Agile development practices. • Performed API testing and debugging to ensure seamless frontend-backend communication.	
Full Stack Developer Intern — Prodigy InfoTech	Jul 2025 – Aug 2025
• Developed full-stack web applications using Flask, Bootstrap, SQLite, and REST APIs. • Designed and integrated backend services with responsive frontend interfaces. • Implemented CRUD operations, database management, and API integration. • Participated in application testing, debugging, deployment, and performance optimization.	

PUBLICATIONS

IEEE AIDE-2026 Conference Paper	Published Paper
• Published in the proceedings of the IEEE Technically Co-Sponsored International Conference on Artificial Intelligence and Data Engineering (AIDE 2026).	

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (Forage)
- MongoDB Developer's Guide (Udemy)
- Cloud Computing – NITTE/Wipfli
